DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, 27-30, 31, 34, drawn to light emitting elements with lens cells for homogenization.

Group II, claim(s) 19-24, drawn to light emitting elements with a phase-shifting device.

Group III, claim(s) 25-26, drawn to light emitting elements with a diffusing element.

Group IV, claim(s) 32, drawn to light emitting elements with an intensity distribution converter.

Group V, claim(s) 38-41, drawn to light emitting elements on a cylindrical mirror for integrating the emitted light.

Group VI, claim(s) 42, drawn to a diffraction optical element.

Group VII, claim(s) 43, drawn to a holographic optical element.

Group VIII, claim(s) 44, drawn to a polarization conversion element.

Group IX, claim(s) 35-37, 45, and 46, cannot be determined.

3. The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

corresponding special technical features for the following reasons: each group is drawn to a light source employing a different illumination optical element that affects the light distribution differently in each case.

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. Figures 3A-B, 5
2. Figures 4A-B
3. Figure 6
4. Figure 7
5. Figure 8
6. Figures 9-10

12. Figure 17
13. Figure 19

5. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. The claims are deemed to correspond to the species listed above in the following manner:

Improper multiple dependencies render the listing of claims unclear. Please amend claims to read in the proper United States Patent format.

The following claim(s) are generic: no claim is generic.

7. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each group is drawn to a light source employing a different illumination optical element that affects the light distribution differently in each case.

8. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
